#### Introduction

Bangkok Bank ("the Bank") recognizes that effective risk management and good corporate governance are essential to the stability and sustainable credibility of the Bank and its subsidiaries in the Group ("the Group"). The Bank therefore places great emphasis on continually improving risk management processes and on having a sufficient level of capital to support business operations, at both the Bank level and the Group level.

The use of market discipline is deemed to be an important driver in the enhancement of the risk management system. Therefore disclosures of information regarding capital, risk exposures, risk assessment processes, and capital adequacy are provided at both the Bank level (Solo Basis) and the Group level (Full Consolidation Basis). The disclosures are in accordance with the disclosure requirements of the Bank of Thailand ("BOT").

The complete disclosure report of information regarding capital management in accordance with Basel III - Pillar 3 is provided, of which the quantitative information regarding capital structure, capital adequacy, market risk assessment and Liquidity Coverage Ratio (LCR) is disclosed semi-annually. As for the disclosure of qualitative information, it is updated annually or when there is a material change in the risk management policy. Disclosures will be made for information that the Bank considers to be of material nature. The Pillar 3 disclosure reports will be made available on the Bank's website under the section "Investor Relations" within four months after the end of relevant period.

#### **Scope of Application**

The disclosure report covers information at both the Bank level (Solo Basis) and the Group level (Full Consolidation Basis). There are 10 companies in the Group consisting of;

- Bangkok Bank Public Company Limited engaged in commercial banking (as the parent company)
- Bangkok Bank Berhad engaged in commercial banking
- Bangkok Bank (China) Company Limited engaged in commercial banking
- BBL Asset Management Company Limited engaged in fund management
- Bangkok Capital Asset Management Company Limited engaged in fund management
- Bualuang Securities Public Company Limited engaged in securities business
- Sinsuptawee Asset Management Company Limited engaged in asset management
- BBL Nominees (Tempatan) Sdn. Bhd engaged in supporting business
- BBL (Cayman) Limited engaged in finance business
- Bualuang Ventures Limited engaged in venture capital

The scope of consolidation for accounting and regulatory purposes has no difference (See Table 6).

# 1. Capital Structure and Capital Adequacy

### 1.1 Capital Structure

The Bank's capital structure according to the regulations on capital requirements under the principles of BOT's Basel III, is revised into Common Equity Tier 1 capital, Additional Tier 1 capital and Tier 2 capital.

- Common Equity Tier 1 capital comprises
  - 1) Paid-up share capital
  - 2) Premium (discount) on common share
  - 3) Legal reserves
  - 4) Reserves appropriated from net profit
  - 5) Retained earnings after appropriations
  - 6) Non-controlling interest classified as Common Equity Tier 1
  - 7) Other reserves
  - 8) Deductions such as intangible assets
- Additional Tier 1 capital consists of non-controlling interest classified as Tier 1 Capital.
- Tier 2 capital consists of
  - 1) Long-term subordinated debt instrument subordinated to depositors and general creditors
  - 2) General provisions for normal assets not exceeding 1.25 percent of credit risk- weighted assets
  - 3) Non-controlling interest classified as Tier 2

In adopting Basel III, as for subordinated debt instruments classified as Tier 2 of which the criteria do not meet qualifications under Basel III regarding capability for loss absorbency of the Bank at the point of non-viability i.e. no conversion feature to common shares or written off upon the authority's decision to make financial support to the Bank, BOT requires phasing out capital at 10 percent p.a. starting from 2013 to 2022.

**Table 1: Capital Structure** 

Unit: Million Baht

|------------------------------|--------------|------------------|--------------|------------------|
| Capital                      | 30 June 2019 | 31 December 2018 | 30 June 2019 | 31 December 2018 |
| Common Equity Tier 1 Capital | 399,202      | 390,309          | 391,162      | 374,633          |
| Tier 1 Capital               | 399,263      | 390,369          | 391,162      | 374,633          |
| Total Capital                | 434,708      | 426,563          | 426,095      | 409,945          |

#### 1.2 Capital Adequacy

The objective of the Bank's and the Group's capital management policy is to maintain an adequate level of capital to support growth strategies within an acceptable risk framework, as well as to meet regulatory requirements and market expectations.

In compliance with the BOT's supervisory review process guidelines, the Bank's capital management process assesses the overall risk and capital adequacy under the Internal Capital Adequacy Assessment Process (ICAAP). The process covers projected assessments of all substantial risks to the Bank's operations, so that the Bank can effectively manage its risks and have a sound capital base for business operations under normal and stress scenarios. Therefore, the capital management process covers the Group level.

The Standardised Approach (SA) is used to measure credit risk, market risk, and operational risk for computing regulatory capital requirements under BOT's Basel III at both the Bank level and the Group level.

Under the principles of Basel III, the BOT requires that commercial banks registered in Thailand and their groups must maintain three minimum capital adequacy ratios: a Common Equity Tier 1 capital adequacy ratio of no less than 4.50 percent, a Tier 1 capital adequacy ratio of no less than 8.50 percent. The aforementioned minimum ratios have yet to include the Capital Conservation Buffer which the BOT is phasing in with an additional capital ratio of more than 0.625 percent p.a. that began on January 1, 2016 rising in increments to more than 2.50 percent on January 1, 2019. Moreover, the BOT requires the Bank, which is classified as a D-SIB, to have additional capital to meet the Higher Loss Absorbency (HLA) requirement by 1.00 percent, beginning with a 0.50 percent increase from January 1, 2019 followed by a 1.00 percent increase from January 1, 2020 onwards. Consequently, a Common Equity Tier 1 capital adequacy ratio of more than 7.50 percent, a Tier 1 capital adequacy ratio of more than 9.00 percent, and a total capital adequacy ratio of more than 11.50 percent are required to be maintained from January 1,2019. Effective from January 1, 2020, Common Equity Tier 1 ratio, Tier 1 ratio and total capital ratio must be more than 8.00, 9.50 and 12.00 percent, respectively, of the total risk-weighted assets.

Moreover, BOT may require banks to maintain additional capital for Countercyclical Buffer at maximum 2.50 percent. As at June 30, 2019, the Bank and the Group has adequate capital for such buffers.

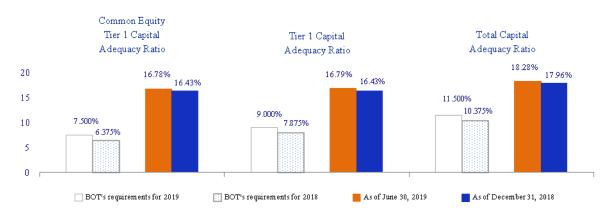

**Table 2: Capital Adequacy** 

| G * 1                        | The          | The Group        |              | e Bank           |
|------------------------------|--------------|------------------|--------------|------------------|
| Capital                      | 30 June 2019 | 31 December 2018 | 30 June 2019 | 31 December 2018 |
| Common Equity Tier 1 Capital | 16.78%       | 16.43%           | 16.81%       | 16.24%           |
| Tier 1 Capital               | 16.79%       | 16.43%           | 16.81%       | 16.24%           |
| Total Capital                | 18.28%       | 17.96%           | 18.31%       | 17.78%           |

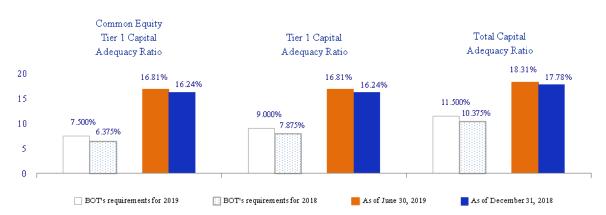

#### **Capital Adequacy Ratio**

#### **Group Level (Full Consolidation Basis)**

#### Bank Level (Solo Basis)

Remark: The BOT requires commercial banks to maintain an additional Capital Conservation Buffer. The buffer will gradually increase by more than 0.625 percent each year from January 1, 2016 until it reaches more than 2.5 percent in January 1, 2019. And the BOT also requires commercial banks to have additional capital requirement for Higher Loss Absorbency (HLA) requirement by increasing the Common Equity Tier 1 ratio at 1 percent, beginning at 0.50 percent from January 1, 2019 and increasing to be 1.00 percent from January 1, 2020 onwards.

# Remark

<sup>&</sup>lt;sup>1</sup> The scope of consolidation for accounting and regulatory purposes has no difference.

#### 2. Liquidity Coverage Ratio (LCR)

According to the Basel III guideline, the Bank is subject to the Liquidity Coverage Ratio (LCR) requirement imposed by the BOT. This guideline aims to ensure that a bank has adequate liquidity to support short-term severe liquidity stress scenarios by requiring a bank to maintain High-Quality Liquid Assets (HQLA) to cover total Net Cash Outflows over the next 30 calendar days under severe liquidity stress scenarios (Net COF). The BOT requires commercial banks to maintain LCR at the end of each month not less than 60%, starting from January 1, 2016. The LCR requirement is to increase by 10% yearly until it reaches 100% on January 1, 2020. The LCR calculation is as follow.

HQLA is unencumbered high-quality liquid asset that can be easily and immediately converted into cash at little or no loss of value even under severe liquidity stress scenarios. All high-quality liquid assets must also meet the minimum standard as stipulated by the BOT. When calculating the amount of HQLA, the value of all qualified assets must be combined and deducted by the haircut value as specified by the BOT. The caps of each class of HQLA must be considered.

Net COF is calculated by deducting the total expected cash inflow from the total expected cash outflow within the period of 30 days during the severe liquidity stress scenario. The total expected cash inflow cannot exceed 75% of the total expected cash outflow and cannot include those assets that are already qualified as HQLA. In calculating expected cash inflow and outflow, the Bank estimates the flows by applying the inflow rates and the run-off rates specified by the BOT.

The Bank's quarterly LCR which is an average of month-end value in each quarter is shown below.

**Table 7: Liquidity Coverage Ratio** 

Unit: Million Baht Average Value for the second quarter<sup>2</sup> Items Year 2019 **Year 2018** 755,123 Total High-Quality Liquid Assets 760,090 Total expected net cash outflows within the next 30 days 245,175 279,416 LCR1 311% 271% Minimum LCR required by the Bank of Thailand 90% 80%

Note

The LCR is computed as an average ratio of month-end LCR in the quarter. This may not be equal to an LCR computed with the average values of HQLA and Net COF.

<sup>&</sup>lt;sup>2</sup> Average of month-end value in the quarter.

The Bank's average LCR for the first quarter and the second quarter of 2019 in comparison with those of 2018 are shown below.

Table 8: Comparison of Liquidity Coverage Ratio

|                    | Average LCR | Year 2019 | Year 2018 |
|--------------------|-------------|-----------|-----------|
| The first quarter  |             | 286%      | 257%      |
| The second quarter |             | 311%      | 271%      |

For the second quarter of 2019, the Bank's average LCR was 311 percent, well above the regulatory minimum requirement of 90 percent.

The Bank's average HQLA was 760,090 million Baht for the second quarter of 2019. Of this amount, 93.5 percent was Level 1 HQLA, which included cash and qualifying debt securities issued or guaranteed by governments, central banks and state enterprises. The remaining was Level 2 HQLA, which were mainly qualifying corporate debt securities rated at least A or equivalent and promissory notes issued by Thailand's Ministry of Finance.

The Bank's average Net COF was 245,175 million Baht for the second quarter of 2019. The expected net cash outflows of the Bank were mainly driven by deposits and borrowings from retails and corporates, as well as contingent bond bought. The main drivers of the Bank's inflows were fully-performing loans, interbank placement and contingent bond sold.

The Bank assesses, monitors and controls liquidity risk through a variety of measurements, along with the LCR, such as loan-to-deposit ratio, cumulative net cash flow positions, funding concentration and Net Stable Funding Ratio. The Bank also regularly monitors the early warning indicators to detect any potential liquidity crisis. This is to ensure that the Bank has sufficient liquidity for business operation as usual and can proactively manage liquidity risk.
